

Alumno: Jose Adrián Aglio Gascón

Profesor: Sergio Agudo Ortiz

Asignatura: Sistemas Informaticos

Ciclo: 1DAM

Nombre de la practica: Permisos Windows10

Crear el usuario Paco sin permisos de administración

The image shows two screenshots from a Windows XP environment. The left screenshot is the 'New User' dialog box. It has fields for 'User name' (paco), 'Full name' (paco), and 'Description'. Below these are password fields: 'Password' and 'Confirm password', both containing four dots. There are four checkboxes: 'User must change password at next logon' (unchecked), 'User cannot change password' (unchecked), 'Password never expires' (checked), and 'Account is disabled' (unchecked). At the bottom are 'Help', 'Create', and 'Close' buttons. The right screenshot is the 'paco Properties' dialog box, specifically the 'Member Of' tab. It shows a list box with 'Users' selected. Below the list are 'Add...' and 'Remove' buttons. A note at the bottom right states: 'Changes to a user's group membership are not effective until the next time the user logs on.' At the very bottom are 'OK', 'Cancel', 'Apply', and 'Help' buttons.

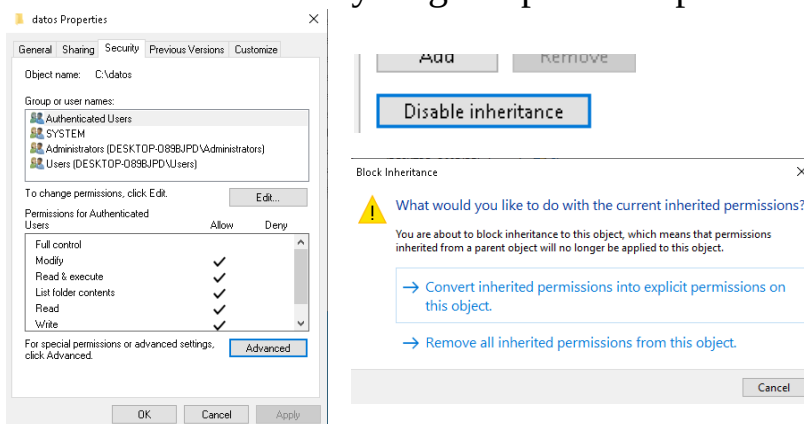

Crear el usuario Manolo con permisos de administración

The image shows two screenshots from a Windows XP environment. The left screenshot is the 'New User' dialog box. It has fields for 'User name' (manolo), 'Full name' (manolo), and 'Description'. Below these are password fields: 'Password' and 'Confirm password', both containing four dots. There are four checkboxes: 'User must change password at next logon' (unchecked), 'User cannot change password' (unchecked), 'Password never expires' (checked), and 'Account is disabled' (unchecked). At the bottom are 'Help', 'Create', and 'Close' buttons. The right screenshot is the 'manolo Properties' dialog box, specifically the 'Member Of' tab. It shows a list box with 'Administrators' and 'Users' selected. Below the list are 'Add...' and 'Remove' buttons. A note at the bottom right states: 'Changes to a user's group membership are not effective until the next time the user logs on.' At the very bottom are 'OK', 'Cancel', 'Apply', and 'Help' buttons.

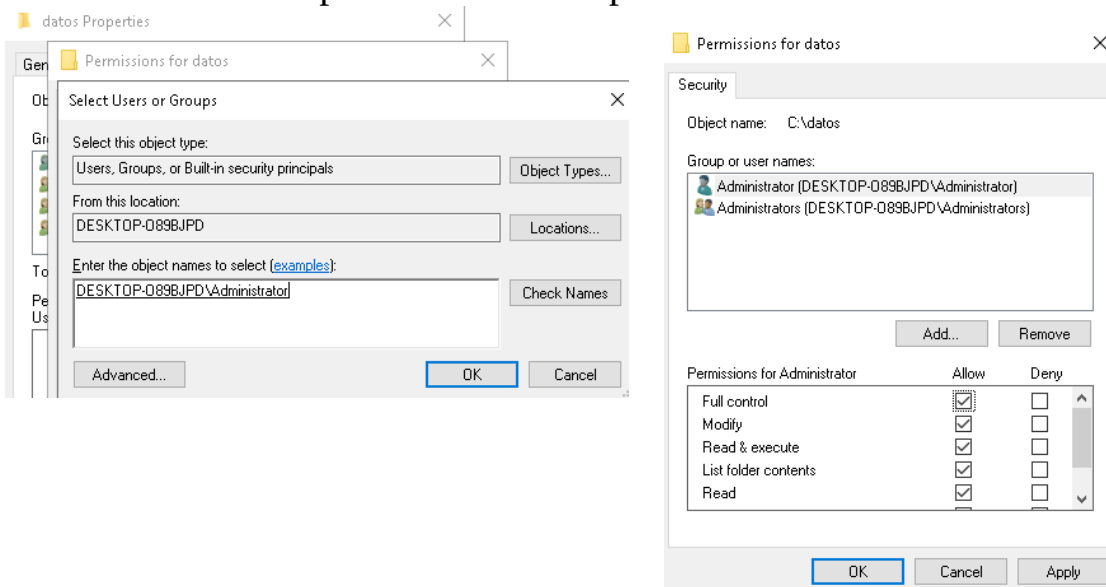

Creamos la carpeta datos en el disco C (click derecho, nuevo, carpeta)

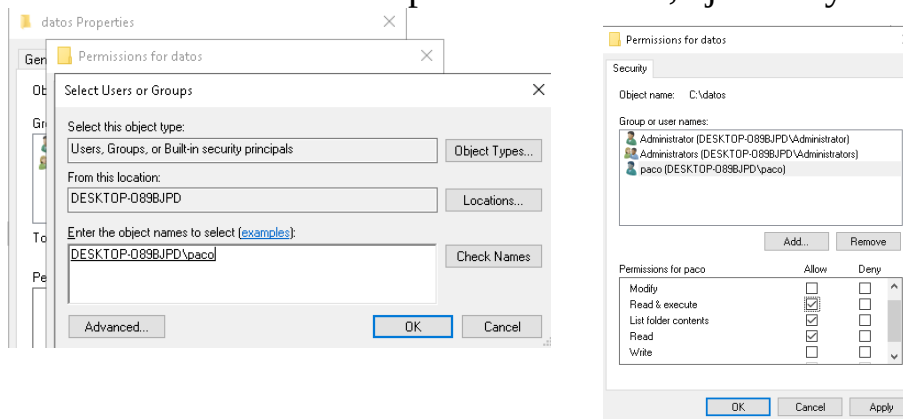

Ahora tenemos que deshabilitar la herencia de datos, para ello tenemos que entrar en propiedades de la carpeta datos, avanzado y hacer click en el boton "Disable inheritance" y elegir la primera opcion

Le damos todos los permisos de la carpeta datos al administrador

Darle al usuario Paco los permisos de leer, ejecutar y ver el contenido de datos

Darle al usuario Manolo los mismos permisos que Paco pero con escribir y modificar
