PRACTICA INSTALAR LAMP Y WORDPRESS EN UN CONTENEDOR

```
root@7f4ef93c296d:/etc/wordpress# apt install apache2 \
                ghostscript \
                libapache2-mod-php \
                mysql-server \
                php \
                php-bcmath \
                php-curl \
                php-imagick \
                php-intl \
                php-json \
                php-mbstring \
                php-mysql \
                php-xml \
                php-zip
